Co-funded by
the Health Programme
of the European Union

The project in a nutshell

*Evidence-based Guidance to Scale-up
Integrated Care in Europe*

- Consortium: 29 beneficiaries and affiliated parties from 10 countries

- Duration: 36 Months
- Budget: € 3,04 Mio; co-funded by the Health Programme of the EU
- Online information:  vigour-integratedcare.eu  @VIGOUR_EU

Background

Integrated care has been a constant theme on the agendas of policy makers and practitioners for decades:

- improved patient experience
- improved outcomes of care
- improved effectiveness of health systems

“Any integrated model development is strongly contextually-bound, nearly impossible to replicate and can only be successful if it does account for unique needs and characteristics of the population it aims to serve.”

WHO Regional Office for Europe (2016): Integrated care models: an overview. Health Services Delivery Programme, Division of Health Systems and Public Health, Working Document, p. 21

How to cut the “Gordian Knot” of operational complexity and systemic inertia when implementing integrated care?

Objectives

- Assist the VIGOUR care authorities in the definition of a context-sensitive strategy for integrating current care practices
- Consolidate existing knowledge, guidance and tools on integrated care
- Provide targeted assistance to VIGOUR care authorities on operationally preparing local scaling-up pilots
- Enable mutual learning by bring together VIGOUR pioneer care authorities with followers (twinning)
- Implement local scaling-up pilots
- Implement a stake holder-oriented project evaluation programme
- Implement sustainable project outcome exploitation measures

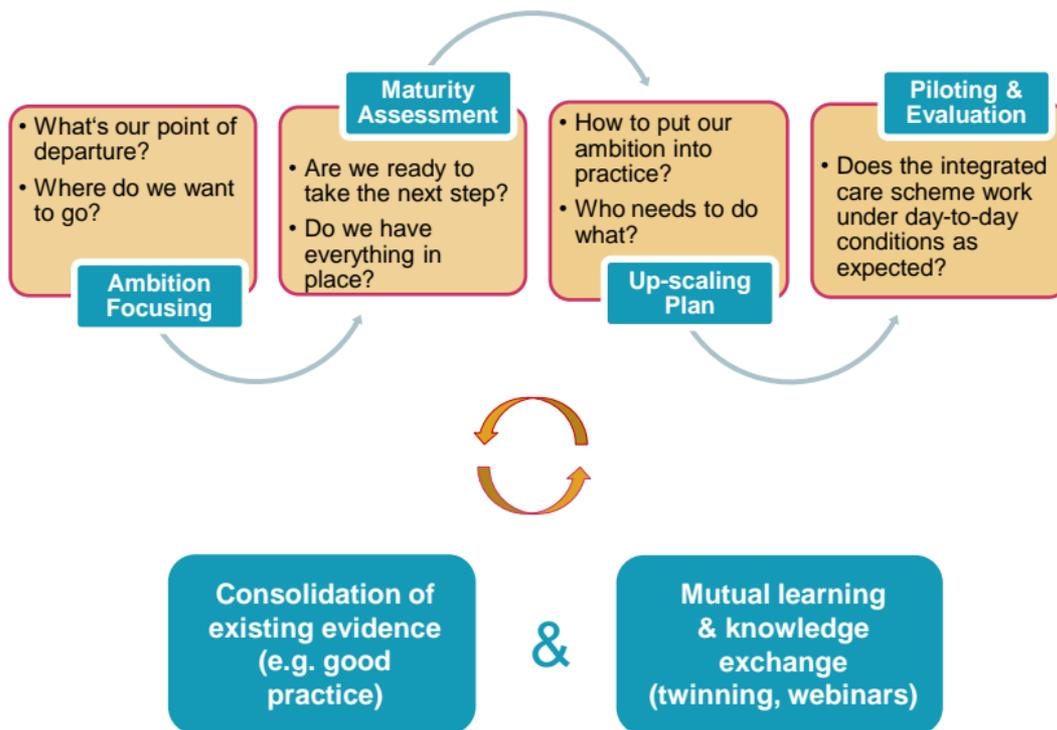

Conceptual approach

Core elements:

- Take care authorities from where they currently stand to support them in taking the next step on their local journey towards integrated care
- Set-up a common support mechanism for conceptually designing, operationally planning and running 15 scaling-up pilots
- Derive lessons learned throughout this process for further utilisation beyond the project duration

Core workplan elements

Thank you!
