

The Improving INtegrated people-centred healthCAre Solutions

2° Webinar of the INCASO Thematic Network
Wednesday 26th June 2019

Joint Statement

Recommendations for Policy Action
(18 June 2019)

About ProMIS: few information to remember

ProMIS, an institutionalized Italian network of the Ministry of health and Italian Regions, whose aim is to promote cooperation on health issues, was born to promote Italy's participation in European funding and projects and to build a constant and qualified presence of Italy in the European and international health framework.

ProMIS is in constant connection with other national Ministries (research, social, tourism, territorial cooperation), National Health Agencies and Institutes in the pursuit of “Health in all Policies”.

ProMIS supports all Italian regions in the management of European projects and deals with communication and dissemination activities regarding health.

Preamble

- The epidemiological transformations have been changing health needs with **a prevalence of chronic diseases**, that require a comprehensive approach embedding prevention, health promotion and an integration of services that is horizontal (between social and health services) and vertical (between levels of care)
- The **INCASO thematic networks** aims at **improving people-centered health care solutions** defining a common vocabulary, specific priorities and interests and creating synergies among the partners and at EU level on the topic, also through the mapping and the collection of good practices

What do we connect to?

- The **B3 Action Group of EIP-AHA** is pioneering the identification and scale-up of citizen centered, validated good practices for integrated care services
- In Italy, in the framework of **ProMIS – Programma Mattone Internazionale Salute Programme**, a dedicated sub-group of Italian Regions activated a specific group on integrated care services.

What do we connect to?

- **VIGOUR** is a project co-funded by the EU's Health Programme addressing key questions on how to put integrated care into practice. ProMIS will lead the WP6 aimed at scaling up good practice in integrated care under day-to-day conditions prevailing in VIGOUR regions and supporting further care authorities in preparing them for scaling-up good practices in integrated care beyond the project duration
- Through the partnership with **RSCN (Reference Site Collaborative Network)**, VIGOUR can count on a direct awareness channel in most European Member States

Recommendations for Policy Action - 1

1. Promote the exchange of good practices and tools that can impact at national/European level, focusing on the implementation of change management for the scale-up of innovative, integrated services

Our commitments: map of European projects related to the topic, disseminate results through ProMIS communication channels (web channels, newsletter, thematic events etc.), foster collaborative approaches to the scale up of innovative practices.

Recommendations for Policy Action - 1

INCASO activities (in progress)

Set up a database to collect European Projects funded in the framework of Interreg, public health and Horizon 2020 Programs (1) to better identify existing/under construction tools/deliverables (particularly ICT) (2) and effectively promote it to all European Regions (3).

(1) Under construction

Project title	PROGRAM 2014-2020	Theme	Leader	Abstract	Website Link
---------------	-------------------	-------	--------	----------	--------------

(online link)

(2) Under construction

Tool title	Typology	Description	Tool Link
------------	----------	-------------	-----------

(online link)

Recommendations for Policy Action - 1

We call on the European Commission to:

- Reinforce the dialogue among DGs SANTE, REGION and CONNECT in the pursuit “health in all policies”
- Combining funding from multiple sources (Direct and Indirect)

We call on Member States to:

- Participate to European projects as advisor in order to guarantee a concrete impact at national levels as well as to multiple the effectiveness on direct and indirect beneficiaries
- Support local and regional authorities in sharing ICT tools to improve integration, quality and sustainability of the services at organizational/management and citizen level
- Reinforce (national plan) training of health professionals on soft and digital skills

Recommendations for Policy Action - 2

2. Locate a single keyword to process shared tools to work within organizational innovation

Our commitments: collection and analysis of regional priorities, expected results and investments, but also sharing of the materials collected with the actors involved and sharing it broadly with all Regions

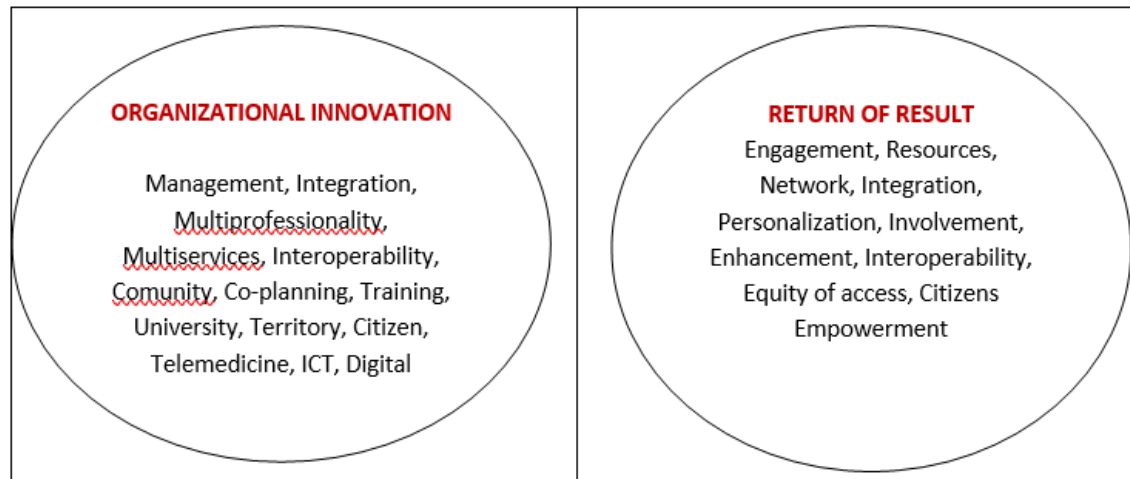

Recommendations for Policy Action - 2

INCASO activities (in progress)

Establish a common ontology (1) to better identify regional and local common needs (2) and effectively implement new solutions within organizational innovation (3).

(1)

(2)

From the regional survey, the need to compare and / or learn and / or scale emerges transversally:

- Effective and efficient organizational models
- Innovative and integrated care pathways / systems
- Renewed technologies and infrastructures
- Training models for "innovation" of human resources
- Evaluation models and innovation support
- Innovative territorial services (family friendly, community friendly, etc.)
- New Business Models

(3)

Launch a new web space to collect new solutions within organizational innovation and promote twinning for scaling up activities. (by 30 August 2019)

Recommendations for Policy Action - 2

We call on the European Commission to:

- Share the defined ontology
- Improve/sustain exchange activities among Regions
- Create guideline on “lesson learnt”

We call on Member States to:

- Starting from the direct involvement of Regions, bring the best national practices to the attention of European Commission and European policy makers

Recommendations for Policy Action - 3

3. Establish INcaso as a permanent network for a constructive dialogue with European Commission, collaborating with existing European networks/partnerships (for instance, EIPonAHA, RSCN) for the sharing of strategies, policies and interventions on the implementation of integrated care by the Italian Regions and other Member States.

Our commitments: annual work activities plan paper elaboration;
annual survey processing and data analysis

Recommendations for Policy Action - 3

INCASO activities (in progress)

We ask to strengthen and make more effective the collaborative networks for actions undertaken within the framework of active and healthy ageing, such as those focusing on integrated services, at European level.

Recommendations for Policy Action - 3

We call on the European Commission to:

- Consider the INcaso network as permanent stakeholder (feedback on European consultation; dialogue on specific issues; source of content and data, etc.)

We call on Member States to:

- Promote INcaso network to regional stakeholders.

Questionnaire on Joint Statement

Introduction

The goal of the survey is to strengthen our statement by collecting your inputs regarding the evaluation of the planned actions, our commitments and the advices addressed to EC and MS on their policy activities.

How fill in the questionnaire

“PLAY YOUR ROLE”

Answer according to your specific point of view:

- Health/social professional (if you work in the health system), or
- Trainer (if you work in a Training Provider Organization), or
- Researcher, or
- Innovator (if you work in a Technology Provider Organization), or
- Patients, or
- Other _____ (please, describe)

For each activity selected, mark - from 1 (not important) to 5 (very important) - the level of importance of the INCASO activities to be achieved.

Activities

	Activities	1 Not important	2	3	4	5 Very important
<p><i>INCASO commitments: map of European projects related to the topic, disseminate results through <u>ProMIS</u> communication channels (web channels, newsletter, thematic events etc.), foster collaborative approaches to the scale up of innovative practices.</i></p>						
1	Set up a database to collect European Projects funded in the framework of Interreg, public health and Horizon 2020 Programmes					
2	Identify existing/under construction tools/deliverables (particularly ICT)					
3	Disseminate databases and tools/deliverables					
<p><i>INCASO commitments: collection and analysis of regional priorities, expected results and investments, also sharing of the materials collected with the actors involved and, broadly, with all Regions</i></p>						
4	Establish a common ontology					
5	Identify regional and local common needs					
6	Effectively implement new solutions within organizational innovation					
<p><i>INCASO commitments: annual work activities; plan paper elaboration; annual survey processing and data analysis</i></p>						
1	Set up annual activities work plan					
2	Set up annual survey processing and data analysis					

Role of the European Commission

	Role of European Commission	1 Not important	2	3	4	5 Very important
1	Reinforce the dialogue among DGs SANTE, REGION and CONNECT in the pursuit of “health in all policies”					
2	Combining funds from multiple sources (Direct and Indirect)					
3	Share the defined ontology					
4	Improve/support exchange activities among Regions					
5	Create guidelines on “lesson learnt”					
6	Consider the INCASO network as a permanent stakeholder network (feedback on European consultation; dialogue on specific issues; source of content and data, etc)					

Role of the Member States

	Role of Member States	1 Not important	2	3	4	5 Very important
1	Participate to European projects as advisor in order to guarantee a concrete impact at national level as well as to increase the effectiveness on direct and indirect beneficiaries					
2	Reinforce the empowerment of training of the health professionals on soft and digital skills through training national plans					
3	Starting from the direct involvement of EU Regions, bring the best national practices to the European Commission and European policy makers' attention					
4	Promote the INCASO network to regional stakeholders
