

EIP ON AHA

# EIP ON AHA ACTION GROUP OUTPUTS

The collaboration between EIP on AHA Action Group partners has led to the development of many other initiatives that are all working to help promote the scaling up of innovative solutions for active and healthy ageing in Europe and beyond

## NETWORKS

- European Covenant on Demographic Change
- SAFE Consortium
- SHAFE Stakeholders Network (Smart Healthy Age-Friendly Environment)
- NET4Age-Friendly - International Interdisciplinary Network on Smart Healthy Age-friendly Environments
- Privacy-Aware Audio- and Video-Based Applications for Active and Assisted Living

## MODELS AND TOOLKITS

- Maturity Model for local service delivery for integrated care
- Diagnosis of European data sharing and exchange across borders in Europe
- Map of European initiatives with evidence-based secure access to/sharing of health data across borders
- Bio-psycho-social approach to frailty (Sunfrail, Advantage)
- Gastrological approach to malnutrition
- The CONSENSO model for community nurses

## PLATFORMS

- Platform Uptake
- Guttman NeuroPersonalTrainer® (GNPT)
- A Web-based platform to ease malnutrition screening programme implementation
- Platform for Knowledge exchange and scaling up in the context of the FOCUS project

## PROJECTS

- iSIMPATY
- INTERREG EU\_SHAFE
- European Mobile Health HUB (mHealthHUB)
- Homes4Life
- Project Change

## PRODUCTS/SERVICES

- Non immersive virtual reality training on functional living skills
- Digital solutions for connected health
- Digital support for integrated care
- Adapted Physical Activity digitally supported service
- The Styria programme (ErGes) for nutrition and health for AHA
- Long Live the Elderly! programme
- AFFINITY National HSE Falls and Bone Health

## TRAINING PROGRAMMES/POLICY WORK

- Hands-on SHAFE – development of practical learning experiences for SHAFE facilitators
- NECTAR Erasmus +
- Inter-University Doctoral Programme in Ageing and Chronic Disease

## SCIENTIFIC PAPERS

- Staying safe in LTC institutions during COVID-19
- Evaluating socio-economic impact of age-friendly environments
- Aligning MASK with the objectives of the EIP on AHA
- ARIA digital anamorphosis
- Rethinking palliative care in a public health context
- Creating a culture of health in planning and implementing innovative strategies addressing non-communicable chronic diseases
- Information and communication technology for increasing healthy ageing in people with non-communicable diseases

The WE4AHA project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 769705.
